Core Competencies: Project Management, Strategic Planning, Business Development, Financial Analysis, Supply Chain (LVMH), Sustainability (CSR).

Languages: Hungarian (Native), English (Full Professional), Swedish (Professional), German (Limited).

Technical: Microsoft Excel (Advanced), Office Suite.

Dear Jönköping Student Union,

As I conclude my BSc in Sustainable Enterprise Development and prepare to begin my Master's in Digital Business and AI Management at JU, I am deeply committed to the long-term strategic growth of our university and student ecosystem. I am applying for the position of **Vice President** in the first place but after discussion I would be also interested in the **President** position for the upcoming academic year.

I bring a proven track record of high-level execution and operational intensity. Over the past year, I founded and served as the Project Leader for the first-ever TEDxJönköpingUniversity. I built and managed a 40-person team, navigated strict international licensing, secured corporate sponsorships (including major partnerships with PWC), and successfully executed a 600-attendee conference. This initiative successfully united students from all four JU faculties with city officials and local business leaders.

I know how to turn an ambitious vision into concrete reality. Furthermore, my time as a Financial Analyst for the JSA Investment Club and my work as intern at Science Park Jönköping have given me a sharp understanding of budget management, stakeholder negotiation, and community building.

I want to bring this same drive and strategic focus to JSU. I understand the university's landscape, I have a strong network within the local municipality, and I am ready to take ownership to drive measurable improvements for the student body.

Best regards,

Gabor Papp

ARNE JOHNSSON

SKILLS

LEADERSHIP

- Led organizational work in a leadership role, coordinating priorities and ensuring progress across various initiatives.
- Made decisions in leadership settings, balancing different perspectives and acting in the best interest of the organization.
- Supported and guided team members in their roles and responsibilities.

PROJECT LEADER

Jönköping University Sport Association (JUSA)

July 2024 - July 2025

ARNE JOHNSSON

Hello,

Over the past operational year, I have had the privilege of being elected as Vice President at JSU. In this role, I have worked closely with the president as part of the presidium, contributed to decision making in the board, and helped shape the organization's long-term strategy. I have also held operational responsibility for matters related to education. I'm very thankful for these experiences as they have deepened my understanding of working with student representation and education, which has led me to want to reapply for the role.

The reason I want to reapply is rooted in a strong desire to build on the progress made this year. As Vice President, I have worked to strengthen the quality of education at JU by representing student perspectives in focus groups. I have also focused on increasing student visibility in educational matters by strengthening collaboration with education committees and reestablishing the student pool. So, as Vice President for 2026-2027 I will aim to further strengthen student influence in education through the student pool and the JSU education committee, ensuring that student voices are clearly represented in the structure and planning of their education.

Before stepping into the role of Vice President, I was actively involved as project leader in JUSA, where I under my mandate initiated new sports activities and organized events for around 600 members. This work contributed to the association being named Association of the Year 2025 by SAIF. In addition, I have been engaged in several other roles, including working as a designer and photographer within JSU's marketing team and serving as team leader for Reklamgruppen - contributing to content creation at Akademien. Through these experiences, I have developed strong skills in leadership, communication, and project management that have been beneficial in the work as Vice President and has led me to assist the organization in other areas such as project leading the development of Rio, rebranding and purchasing new sound systems and equipment for events.

Alongside my involvement in associations, I have worked as a lab assistant at JTH, supporting students in web and design courses. This role has given me valuable insight into how students experience their education and has strengthened my ability to listen to and address their needs when working on student cases.

I am driven by the opportunity to make a meaningful difference for students and to continue developing an organization that reflects their needs and perspectives. I would be grateful for your continued trust to carry this work forward.

Thank you for your consideration.

Kind regards,

A handwritten signature in black ink, appearing to read 'Arne', with a long horizontal line extending to the left and a loop to the right.
